

AMENDMENT TO THE SPECIFICATION

Please insert the following abstract on a new page at the end of the specification.

IMMUNOASSAY

Abstract of the Disclosure

The present invention relates to methods of assaying the levels of proteins or antibodies in a test sample. In particular, the present invention relates to a method of determining the relative abundance of a plurality of proteins in a test sample compared to a reference sample, the method comprising: (a) providing a reference sample comprising a plurality of labeled proteins; (b) incubating a plurality of tagged antibodies capable of binding components of the reference sample with (i) a mixture of the labeled reference sample and the test sample and (ii) the reference sample alone, under conditions suitable for the binding of said antibodies to their targets; (c) comparing the amount of labeled protein bound to individual antibody tags in the presence and absence of the test sample.
